

CBCA404: Web Application Development-II Lab

Date of Submission: 3 January 2026

Revision of CBCA304

Q1. Create a Portfolio Website with the following specifications:

- Home page should contain a header section containing the website's title, your name and role. A footer section with contact information. A horizontal navigation bar with links. The navigation bar should be sticky at the top, so it remains visible as users scroll down.
- About: Brief introduction, Educational goals, Career goals.
- Skills: Programming languages, Web technologies, Databases, Tools.
- Projects: Project title, short description, Technologies used, Github links/demo links.
- Internships/Experience: Internship details, duration, roles skills gained.
- Certifications/Achievements: Online certifications (Swayam, SpokenTutorial etc.), hackathons, workshops, conferences etc.
- Gallery (optional): screenshots of projects, applications, UI designs, academic/technical events. Participations in events. For gallery, you may use CSS Grid or flexbox. Include captions for each image.
- Contact Me: email id, phone number, github links, contact form
- Resume: must be in pdf downloadable format.

Important Instructions

- You may take design inspiration from professional portfolios, but the implementation must be your own. Also attach a list of references after your assignments.
- For projects showcasing portfolio items, display a grid layout. You may use a **portfolio container** displaying individual projects or portfolio items.
- Style links and buttons with **pseudo-classes** and **pseudo-elements**.
- Maintain proper indentation and comments.
- Make use of external CSS file and internal CSS.
- Your code must be well-indented.

DONOT COMPLETE THIS TASK FOR THE SAKE OF ASSIGNMENT COMPLETION & SUBMISSION. Your portfolio should reflect your skills as a Computer Science BCA student. Keep on updating your portfolio and live it and showcase.
